

St. Louis Company Named To Sell Geodesic Domes

John Combs, well-known building materials representative in the St. Louis area who recently opened his own distribution and market firm, has been named sales representative of the all-aluminum geodesic dome manufactured and erected exclusively by Temcor.

The appointment was announced by Dr. Robert D. McCauley, sales manager for Temcor of Torrance.

Combs, who has more than 20 years experience in handling metal building products for the construction industry, and in representing such products to architects and engineers, will

structured floor space. The aluminum may be of clear or gold-anodizing. With all components manufactured at the Torrance plant, a five-man Temcor crew can erect a dome on its site in four or five weeks.

Construction is by a unique "top-down" assembly method which allows the workmen to remain on the ground, assembling the panels and trusses around a central hoisting tower. As each ring of components is

completed, the entire assembly is hoisted to allow the installation of the next ring. When the dome is completed and set on its support, the lifting tower is removed and the hole is filled with either more panels, a skylight or a cupola ventilator. The domes, which have been erected in many parts of the world, are designed for a 40 psw snow load capacity, and have withstood hurricane winds of 125 mph without damage.

Drop in Earnings Reported

Southern California Edison Co. has reported third-quarter results which reflected increases in operating revenues, net income, and kilowatt-hour sales, but a decline in earnings per share. Jack K. Horton, chairman and chief executive officer, announced that operating revenues for the third quarter totaled \$153.3 million as

compared with the \$143.8 million reported for the third quarter in 1967. Revenues for the nine months ended Sept. 30 this year totaled \$439.8 million, a 6.9 percent increase over the \$411.2 million reported for the same period last year. Net income for the third quarter this year was \$26.7 million, slightly higher than

the \$26.4 million recorded for the equivalent period in 1967. Net income for the first nine months of 1968 totaled \$75.0 million, compared with \$75.6 million reported for the corresponding period last year. EARNINGS per share for the third quarter were 61

cents on a weighted average basis on common and participating original preferred stock, as compared with the 64 cents per share for the third quarter of 1967 on a fewer number of shares. Earnings per share for the nine-month period amounted to \$1.73 on a weighted average basis, as compared with the \$1.82 reported for the corresponding period last year.

JOHN COMBS
Sales Representative

represent Temcor throughout most of Missouri and the southern half of Illinois.

THE TORRANCE firm manufactures and erects the geodesic domes which can span nearly 200 feet without interior support. Designed on the geodesic geometry, they are made of space-trussed aluminum and heavy-gauge, diamond-shaped anodized aluminum panels.

Such domes have been erected for high school gymnasiums, auditoriums and cafeterias; for recreation centers, theaters and sports arenas, and for entertainment and recreational facilities.

The most unusual use is found at Auburn, Calif., where five domes are clustered to form a 25,000 square-foot building to house the Placer County offices.

Dominguez Area Road Work Set

Improvement of a section of Brant Avenue west of Alameda Street in the Dominguez area has been approved by the Board of Supervisors, according to Supervisor Burton W. Chace.

The section is situated between 20th and Dominguez streets in a rapidly expanding industrial area.

Cost of the highway improvement project is \$1,000. The work will consist of widening the east side of the existing roadway to join curb and gutter recently constructed under county permit by owners of properties in the affected area, Chace said.

PPG Votes Two-for-One Stock Split

A two-for-one stock split has been approved by stockholders of PPG Industries. The split, which is to become effective Nov. 27, was recommended by PPG's board of directors last August to "improve the marketability of PPG's stock."

Company officials said the new stocks will be distributed Dec. 27, 1968, to shareholders of record at the close of business Nov. 27.
